

classic global blend

What is Classic Global Blend?

Classic Global Blend is a complete nutritional support juice formula consisting of three major types of nutrients: Antioxidant-rich superfruits, critical primary-antioxidant promoting nutrients, and an herbal blend of adaptogens.

What does Classic Global Blend do?

Classic Global Blend delivers the critical nutrients your body needs to produce primary antioxidants. These primary antioxidants protect your body 24 hours a day, neutralizing free radicals as they are created at the cellular level. Classic Global Blend also gives you comprehensive overall protection through a unique blend of adaptogens which balance and normalize the body, insuring that you can absorb and utilize the nutrients provided in this unique blend. Classic Global Blend may help:

- Neutralize free radicals
- Increase energy
- Promote youthfulness and vitality
- Balance hormones
- Reduce inflammation

Classic Global Blend combines the most powerful, nutrient-dense superfruits with primary antioxidant precursors and herbal adaptogens. This strategic combination causes a synergy that multiplies the effectiveness of all three.

Supplement Facts

Serving Size: 2 Tablespoons (1 fl oz)
Servings Per Container: 28

	Amount Per Serving	%DV
Calories	15	
Total Carbohydrate	4g	1%*
Sugars	4g	†
Vitamin C (as ascorbic acid)	30mg	50%
Proprietary Hi Orac Blend:	6,400mg	†

Key Ingredients

ACAI - Has been recommended for heart and cardiovascular health, may play a role in lowering cholesterol, and is thought to play a role in slowing down the aging process.

GOJI BERRY - May help fight fatigue, regulate blood pressure & blood-sugar, and may also help relieve headaches & insomnia, while helping to regulate weight.

NONI FRUIT - May help stabilize blood sugar levels while reducing inflammation and joint pain. May also help improve digestion, cleanse the digestive tract, and minimize irritable bowel syndrome, constipation, and diarrhea.

GREEN TEA - Has potential to lower total cholesterol levels, while improving the ratio of good (HDL) cholesterol to bad (LDL) cholesterol. It may also provide benefits for weight loss, regulating blood pressure, improving skin health and in some studies has shown to be an effective anti-viral and anti-bacterial.

AMLA - A good source of vitamin C, has antioxidant properties, and studies suggest that it has potential efficacy against inflammation, age-related renal disease, and diabetes.

GINSENG - Has been shown to improve cardiovascular health, immune system and nervous systems. It also assists the function of the adrenal glands during exercise to build strength and endurance.

GLUTAMIC ACIDS - Precursor of GABA but has somewhat the opposite function; it is an excitatory neurotransmitter. It is one of the few nutrients that crosses the blood-brain barrier and is the only means by which ammonia in the brain can be detoxified. It is considered to be nature's "Brain food" by improving mental capacities.

CYSTEINE - Is a precursor to the liver detoxifying and antioxidant amino acid glutathione. This functionality provides an anti-aging effect on the body—even reducing the accumulation of age spots. Another impressive function of Cysteine is the breakdown of mucus in the respiratory tract which can help in bronchitis, emphysema, and tuberculosis.

GLYCINE - Supplies additional creatine to muscles and is used to construct DNA and RNA. It functions in skin, connective tissues, the central nervous system and prostate.
